

# RESPIRATORY THERAPY

Respiratory therapy is an allied health profession specializing in the diagnosis, treatment, and care of patients suffering from cardiopulmonary disease.

The program provides didactic instruction and supervised clinical practice in Southern California hospitals. Graduates of the VVC Respiratory Therapy Program, as a result of the education and training they receive, pass the state licensing and national registry exams at a rate much greater than the national average. The Victor Valley College Respiratory Therapy Program is accredited by the Commission on Accreditation for Respiratory Care (<https://www.coarc.com/>), 264 Precision Blvd, Telford, TN 37690, (817) 283-2835.

**A separate application must be made to the Respiratory Therapy Program. Seating is limited to a maximum of twenty-six students per class.**

Applications are available from the VVC Respiratory Therapy ([http://www.vvc.edu/academic/respiratory\\_therapy/](http://www.vvc.edu/academic/respiratory_therapy/)) website.

Program yearly requirements paid for by student:

- National background check
- Titers demonstrating immunity to Tetanus, Diphtheria, Pertussis, Varicella, Mumps, Measles, Rubella
- Two Tuberculosis tests during first summer course
- COVID-19 immunizations to include booster
- Physical examination by a physician
- Background check and drug testing

Please contact the Respiratory Therapy program director for information and forms.

## Career Opportunities

Respiratory Care Practitioner, Critical Care Specialist, Neonatal/Pediatric Specialist, Pulmonary Rehabilitation, Medical Transport, Diagnostic Testing Specialist, Home Care, Sleep Study Specialist, Wound Care, Hyperbaric Oxygen Therapy, Research, Management/Administration, Case Manager, Education,

## Faculty

Cullin, Sean

Marin, Traci

## Transfer

The Respiratory Therapy courses are UC and CSU transferable. There are several Colleges and Universities that offer Respiratory Care, BS to which the RSPT courses are transferable. For the most up-to-date information on these programs and others, stop by the Transfer Center in Building 23 or make an appointment with a counselor.

## Programs of Study

- Respiratory Therapy Certificate of Achievement (<https://catalog.vvc.edu/degrees-certificates/respiratory-therapy/respiratory-therapy-ca/>)

- Respiratory Therapy, AS (<https://catalog.vvc.edu/degrees-certificates/respiratory-therapy/respiratory-therapy-as/>)

## Program Learning Outcomes

Program Learning Outcomes (PLOs) are statements of the kind of learning a program hopes a student will achieve. The PLOs describe the knowledge, skills, problem-solving, communication and values that apply to all certificates and/or degrees within that program.

The Victor Valley College Respiratory Program's overall goal is to prepare graduates with demonstrated competence in the cognitive (knowledge), psychomotor (skills), and effective (behavior) learning domains of respiratory care practice as performed by registered respiratory therapists (RRTs). The goals are assessed in using program learning outcomes (PLO's)

Upon completion of this program, students should be able to:

- Demonstrate the ability to comprehend, apply, and evaluate clinical information relative to their role as an advanced-practiced therapist (Cognitive Domain)
- Demonstrate the technical proficiency in all skills necessary to fulfill the role of Registered Respiratory Therapist (Psychomotor Domain).
- Demonstrate behaviors consistent with professionalism and meet employer expectations for the Registered Respiratory Therapist (Affective Domain).

## Respiratory Therapy Courses

### RSPT 50 Polysomnography I (4.0 Units)

Topics include sleep terminology, sleep structure and disorders, complete polysomnography patient set-up and data acquisition. Students will also learn the basics of noninvasive treatments for certain sleep disorders.

Lecture Hours: 54.0; Lab Hours: 54.0

Transfer: Not transferable

### RSPT 221 Basic Cardiopulmonary Clinical Practicum (3.0 Units)

Clinic-based practicum in which students perform a variety of cardiopulmonary assessments and therapies appropriate to their level in the respiratory therapy and echocardiography courses. Students present case studies based on patient-information gathering that include history and physical, review of systems, rationale for diagnostics and treatment, vital signs, medical history, questionnaire, scores, treatments, and study data.

Prerequisite(s): RSPT 90 or RSPT 231, Minimum grade C

Lab Hours: 162.0

Transfer: Not transferable

### RSPT 222 Advance Cardiopulmonary Clinical<sup>1/2</sup>practicum and Case Studies (3.0 Units)

Critical care clinic-based practicum in which students perform a variety of cardiopulmonary assessments and therapies. Students present case studies based on critical care patient-information gathering that include history and physical, review of systems, rationale for diagnostics and treatment, vital signs, medical history, questionnaire, scores, treatments, and study data.

Prerequisite(s): RSPT 233, Minimum grade C

Lab Hours: 162.0

Transfer: Not transferable

**RSPT 230 Introduction to Respiratory Therapy (3.0 Units)**

Course introduces the student to respiratory therapy as a health science profession including history, professional requirements, responsibilities, professional organizations, and credentialing of the respiratory care practitioner. Provides basic anatomy and physiology, physics and math, and basic cardiopulmonary pathology to provide the student a foundation of theory and application. Offered summer. Prerequisites: Acceptance into the Respiratory Therapy Program.

Lecture Hours: 54.0

Transfer: Transfers to CSU only

**RSPT 231 Basic Fundamentals of Respiratory Therapy (10.0 Units)**

This course introduces respiratory therapy students to basic physical assessment, infection control, clinical applications of basic therapeutic and diagnostic modalities, chart review and documentation. Students are provided with an extensive orientation to the hospital environment and administration of basic respiratory therapy to clients.

Prerequisite(s): RSPT 230, Minimum grade C

Lecture Hours: 72.0; Lab Hours: 324.0

Transfer: Transfers to CSU only

**RSPT 232 Patient Assessment & Clinical Application of Respiratory Therapy (10.0 Units)**

This course expands the theory and application of respiratory therapy introduced in RSPT 230 and 231. Course content includes advanced cardiac life support and airway management, advanced assessment of cardiopulmonary pathology, cardiopulmonary rehabilitation, home care, transport, patient education, medical ethics. Content also includes thorough discussion of labs, imaging, ECG, and pharmacology. The student will spend 24 hours per week in the hospital administering respiratory modalities. Offered Spring semester.

Prerequisite(s): RSPT 231, Minimum grade C

Lecture Hours: 72.0; Lab Hours: 324.0

Transfer: Transfers to CSU only

**RSPT 233 Intensive Respiratory Therapy Care (13.0 Units)**

This course expands the theory and application of respiratory therapy introduced in RSPT 232. Content includes advanced modalities such as mechanical ventilation, systemic assessment of the intensive care patient, advanced cardiopulmonary physiology and pathology.

Prerequisite(s): (BIOL 211 or BIOL 231 Minimum grade C) and (RSPT 239)

Lecture Hours: 72.0; Lab Hours: 486.0

Transfer: Transfers to CSU only

**RSPT 234 Neonatal/Pediatric Respiratory Therapy Care and Related Pathophysiology (13.0 Units)**

This course is an advanced study of the theory and application of neonatal and pediatric respiratory care. The content will include: mechanical ventilatory support, advanced cardiopulmonary pathophysiology, equipment used in NICU and PICU, umbilical line and capillary blood sampling and analysis, endotracheal intubation, and principles of PALS and NRP.

Prerequisite(s): (BIOL 221, Minimum grade C) and (RSPT 233)

Lecture Hours: 72.0; Lab Hours: 486.0

Transfer: Transfers to CSU only

**RSPT 239 Introduction to Mechanical Ventilation Support (2.0 Units)**

This course introduces the principals of mechanical ventilation, allows hands-on experience with current ventilators, and reinforces therapeutic care.

Prerequisite(s): RSPT 232, Minimum grade C

Lecture Hours: 18.0; Lab Hours: 54.0

Transfer: Not transferable

**RSPT 243 Clinical Simulation (1.0 Units)**

This course will prepare individuals for the National Board of Respiratory Care's (NBRC) Therapist Multiple-Choice Examination (TMC) and Clinical Simulation examinations. Those already certified (Certified Respiratory Therapist) and designated registry eligible by the NBRC will be able to review, evaluate, and improve their clinical assessment, decision making, and test taking skills.

Prerequisite(s): RSPT 233, Minimum grade C or CRT/RCP credentials with "registry eligibility" as designated by the NBRC/RCB.

Lecture Hours: 18.0

Transfer: Transfers to CSU only
